VINTAGE 70'S WAH SOLASOUND MADE, **SOLD**

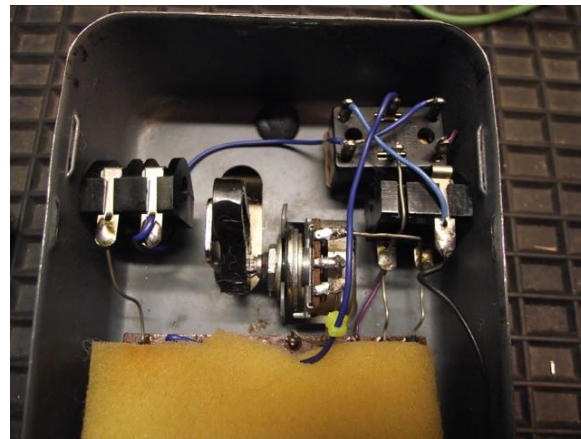

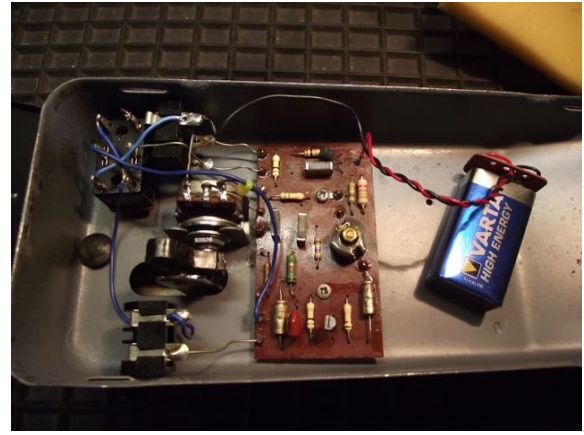

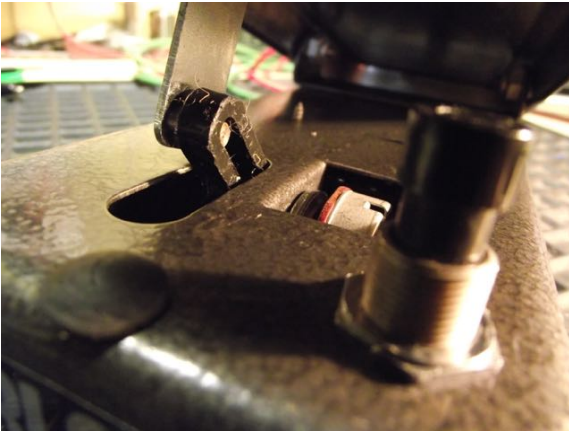

BRANDED "CARLSBRO".

Made as a wah-swell, but the swell mode is a known bogey — —-runs through a buffer amp that is awful, plus if that's not enough, the single pot design means

that the swell is in reverse on the pedal, so when switched in, its heel down for volume up, bonkers! So its had the standard mod to make it the perfect 70's SolaSound Wah— --True bypass, Wah only. Full electronic repair/service as reqd, including original pot stripped down & renovated to run silent. Has an unusual sweep partly due to the unconventional cam mechanism from pedal to pot. Wide range, and very useful, since it smooth not honky/peaky in use. Check out the pics.....it looks cool too! It has the original battery snap, in very good condition, and even has the original foam wrap. Oh, and the rubber stripping on the base is good, too!

SOLD

Fully serviced, ready to go, should have years of service in it.....good as new!

Snip at £120 (plus shipping)

Remember....will ship anywhere in the world, happy to ship to USA.
